

TECHNOVA SOLUTIONS

Standard Refund and Return Policy

Thank you for choosing TechNova Solutions. We are committed to providing high-quality technology solutions, hardware, and digital services. If you are not entirely satisfied with your purchase, we are here to help clear up your options under a transparent framework.

1. Return Window

Customers may initiate a return request within **$T = 30$** calendar days from the date of delivery or formal receipt of the item. Requests submitted outside this **30-day** window cannot be processed for standard refunds or voluntary exchanges.

2. Eligibility Criteria

To qualify for a standard return and full refund, the following criteria must be met in full:

- The product must be unused, unaltered, and in the same physical condition as received.
- The product must be enclosed in its original, undamaged manufacturer packaging.
- All accompanying documentation, manuals, cables, remote controls, and accessories must be included in the return parcel.
- A valid proof of purchase (invoice, order confirmation, or receipt) must be presented.

3. Non-Refundable Items

Certain classes of items are strictly excluded from our standard return infrastructure. These include:

- Custom-built computer systems, personalized configurations, or engraved hardware units.
- Clearance, "Final Sale," or explicitly marked promotional liquidation inventory.
- Consumable items that have been unsealed (e.g., thermal paste, blank optical media, specialized cleaning solutions).
- Products missing their original Serial Number or Unique Device Identifier (UDID).

4. Digital Products and Software

Digital products—including downloadable software licenses, SaaS subscriptions, API tokens, and enterprise cloud access codes—occupy a distinct status:

- **Unactivated Licenses:** Eligible for a full refund within **14** days of purchase, provided the activation key has not been generated, viewed, or validated on our authentication servers.

- **Activated/Downloaded Assets:** Once a digital key is revealed or a software package is downloaded, the transaction is considered finalized and non-refundable, except where mandated by local consumer protection statutes.

5. Damaged, Defective, or Incorrect Products

If a product arrives broken, physically compromised, or differs from your invoice, the standard limitations are adjusted:

- Customers must notify TechNova Solutions support within **7** calendar days of delivery regarding visible physical damage or shipping errors.
- TechNova Solutions assumes full financial responsibility for replacing the item or issuing a complete refund, including all baseline outbound and inbound logistics fees.
- Photographic evidence of the damage and shipping container is required to initiate an expedited resolution protocol.

6. Order Cancellation Rules

Order cancellations are governed by the processing state of the transaction:

- **Pre-fulfillment:** Orders cancelled before allocation or dispatch from our fulfillment centers receive an immediate **100%** refund with zero processing penalties.
- **Post-fulfillment:** If an order is already processed or in transit, it cannot be aborted mid-route. The customer must receive the parcel and initiate a standard return under Section 2.

7. The Refund Process

To successfully process an eligible return, please follow these systematic operational steps:

1. Log into your TechNova Solutions account portal and navigate to the "Order History" tab to request a Return Merchandise Authorization (RMA) number.
2. Securely package the asset, ensuring the RMA number is clearly visible on the external shipping label (do not write directly on the manufacturer's product packaging).
3. Dispatch the package via a trackable courier service to the designated return depot address provided in your RMA confirmation email.

8. Refund Timeline

Once your return package arrives at our verification depot, the financial resolution timeline proceeds as follows:

Inspection Window: Please allow **3** to **5** business days for our engineers to physically inspect and test the returned hardware to ensure compliance with eligibility baselines.

Credit Execution: Upon structural approval, a refund is issued directly back to the original funding source. Credit card processors generally require **5** to **10** banking business days to reflect these transactions on your balance statements.

9. Customer and Company Responsibilities

Operational balances are maintained through shared fiscal and administrative duties:

- **Customer Responsibilities:** The customer covers return shipping fees unless the item falls under Section 5 (Damaged/Defective). The customer bears full risk of loss or physical damage during transit back to our facilities; purchasing shipping insurance for high-value items is highly recommended.
- **Company Responsibilities:** TechNova Solutions is responsible for providing clear RMA infrastructure, executing impartial inspections, and rendering funds transparently within the specified timeline bounds.

10. Frequently Asked Questions

Q: Do I have to pay restocking fees for returning an open hardware product?

A: No. TechNova Solutions does not charge standard restocking fees, provided all original contents, packaging inserts, and accessories are perfectly intact and undamaged.

Q: Can I exchange my product for a more expensive model instead of getting a refund?

A: Yes. During the RMA generation process, you can select "Store Credit Exchange" to apply your approved return value toward an immediate hardware upgrade or parallel alternative product.

Q: What happens if my return is rejected during the inspection phase?

A: If an item arrives missing parts or showing structural user damage, our team will contact you with an inspection breakdown. In such scenarios, the item will be shipped back to you at your expense, or a partial store credit will be offered at our discretion.
