

TECHNOVA SOLUTIONS

Corporate Shipping & Fulfillment Policy

TechNova Solutions coordinates an optimized global logistics infrastructure to ensure your hardware architecture, computing systems, and corporate enterprise assets are dispatched securely and efficiently. This Shipping Policy details our execution timelines, delivery modalities, operational constraints, and shared risk ownership frameworks.

1. Processing Time

Orders containing standard components are fully processed, validated, and staged for carrier collection within 1 operational business days. High-performance enterprise compute hardware or customized system configurations demand a separate baseline integration window of 3 business days prior to dispatch.

Orders received after 15:00 UTC on Fridays or during public holiday extensions will enter the processing sequence on the next available operational business morning.

2. Shipping Methods & Delivery Estimates

We leverage leading commercial freight and parcel logistics entities to supply tailored delivery metrics. Standard transport timeframes are summarized below:

Service Modality	Domestic Transit Window	International Transit Window
Standard Freight Ground	3 – 5 Business Days	7 – 14 Business Days
Expedited Air Transport	1 – 2 Business Days	3 – 5 Business Days
Priority Same-Day (Selected Hubs)	Same-Day Delivery	Not Applicable

3. Shipping Charges

Logistics tariffs are dynamically generated at check-out based upon volumetric dimensions, deadweight calculation, selected service class, and geographic destination zones. Any domestic standard order exceeding a value baseline of \$500 qualifies for complimentary ground logistics.

4. Tracking Orders

Immediately upon cargo hand-off to our carrier network, an automated transaction dispatch message is distributed to your registered email coordinate. This notice displays a unique, unalterable digital tracking

identifier alongside a direct hyperlink to the carrier portal, ensuring complete transparency regarding active asset coordinates.

5. International Shipping Frameworks

TechNova Solutions serves an expansive global consumer and corporate framework. International shipments are executed under standard commercial terms:

- **Duties and Levies:** All localized custom tariffs, border entry duties, sales taxes (VAT/GST), and handling fees remain the exclusive administrative and fiscal obligation of the designated importer/customer.
- **Cross-Border Clearance:** TechNova Solutions is not responsible for operational delays incurred due to mandatory regulatory inspections or arbitrary customs processing holdups.

6. Delayed Shipments

While we strive for absolute accuracy, unexpected logistics stress (extreme meteorological conditions, widespread labor actions, or global carrier hub sorting backlog) may trigger transit delays.

If a package experiences an extended delay passing **3** business days past its maximum estimated delivery target, TechNova Solutions will initiate a prioritized carrier tracer routine. If standard expedited transit terms were paid for and missed due to carrier fault, an immediate credit for the explicit shipping surcharge will be processed.

7. Lost Packages

A package is officially declared lost if it remains un-delivered with zero active carrier status scan updates for a period extending past **14** calendar days. Once verified as unrecoverable by the logistics agent, TechNova Solutions will immediately build and fast-track a duplicate replacement shipment or issue a complete financial credit back to the primary funding account, at the user's choice.

8. Incorrect Address & Delivery Failures

Accurate destination management is vital to systemic logistics speed:

- The client maintains absolute responsibility for verifying address accuracy prior to checkout.
- If an delivery loop fails due to incorrect address inputs or failure to clear building access protocols, the item will return to our center.
- The client will be billed for all subsequent re-delivery logistics fees and any auxiliary return-to-sender tariffs applied by the freight operator.

9. Contact Support

For continuing delivery updates, immediate route routing adjustments, or to report logistics discrepancies, please engage our tracking desk directly through the following paths:

- **Enterprise Logistics Portal:** tracking.technova.solutions
- **Dedicated Operations Desk Email:** fulfillment@technova.solutions
- **Standard Availability:** Monday through Friday, 09:00 - 18:00 (Standard Business Hours)
